## Introducing Korea WEST Program

Korea WEST Program launched in the fall of 2008 by the U.S. Department of State and Government of the Republic of Korea to give outstanding Korean citizens and recent graduates like me the opportunity to improve my business English, receive bona fide training from executive leaders from participation in two (2) internships (initial and final). This is a strategically important program designed to build future leaders and create greater collaboration between the U.S. and Republic of Korea.

## Objective

Seeking an innovative work-based training relationship with a competent senior executive employer.

## 6-Month Rotational Internship

Each week, pair me with several English speaking Associates in various roles or departments who are willing to describe their position and responsibilities so I can learn techniques, methodologies, and technology used by the Host Company.

## Exchange Ideas

Each week, the department head will assess my competency and my weekly project report before a presentation to my peers.
